

Important Notice

Voluntary Water Ban

In accordance with RSA 41:11-d, effective immediately, there will be a Voluntary Water Ban for all residents within the boundaries of the Town of Atkinson until further notice.

Please note that this ban is being put in place due to the extreme drought conditions that have occurred this year. The Town has been getting calls from people whose wells have gone dry, so hopefully residents will be considerate of their neighbor and only use outside water when absolutely necessary. If you have a sprinkler system running off your well and have not already done so, we would ask that you have it shut down for the season now. Those residents who get water from the Hampstead Water Company have been under restrictions for a good part of the summer but with the water table down almost 17inches, the Selectmen felt it was important to implement this order immediately so that those with their own wells would also stop unnecessary use of water on their property.

We thank you in advance for your compliance.
