Waste Management's Roy Boyer responded to the previous meetings proposal of reducing costs in some areas, by referencing a printed proposal by Waste Management that covered fuel surcharge explanations and an alternate method of computing costs (the current method is determined by a two week evaluation, WM recommends utilizing a 6 month period) The addendum to a 6 month evaluation to Atkinson's current contract would save the community approximately \$20 per billing period.

The second recommendation was one of a single stream recycling effort with a 96 gallon recyclables and a 64 gallon trash program for residents that will save approximately 25 thousand a year in costs to the town.
